

Your trusted IT partner for long-term success

Managed IT services by **RedDoor**

Welcome to RedDoor IT

At RedDoor, we're more than just a provider of IT solutions — we're your trusted technology partner, delivering tailored IT support and cyber security, internet provision and related services.

Why choose us?

Our motivated and highly trained technicians deliver bespoke IT solutions that meet your needs and budget, and our tailored approach means that you will only pay for the services you require. We deliver IT support, guidance, and security to maximise the return on your investment.

We are passionate about how technology can be harnessed to support your business, offering leading IT support services, including PC, server and network support, new installations, system upgrades, consultancy, and a full suite of cyber security services.

Our team

Our friendly UK-based team prides itself on trust and excellence in their diverse range of offerings.

With over a decade of experience, our highly qualified staff is available 24/7, delivering simple and cost-effective solutions without jargon. They provide custom real-time reporting and flexibility, prioritising client care and reliable support.

Managed IT services

RedDoor provides world-class proactive managed IT support to businesses of all sizes. We make your IT work so that you can focus on your core business.

We take a full approach to your IT systems and invest in managing your security. This includes web and email filtering and security, firewalls, anti-virus software, data loss prevention, mobile and device management, vulnerability scanning and end-to-end encryption.

Our team identifies potential security risks and offers advice and guidance regarding the best solutions for your business.

We ensure your business takes advantage of the latest technological innovations so you can rest assured that your data, applications, and software are safe. Our service also provides valuable business continuity.

CyberAdvisor powered by RedDoor

In the bustling digital landscape of London and the UK, ensuring the safety and security of your business against cyber threats is of utmost importance.

That's where CyberAdvisor comes in to guide you through the complexities of cyber security and the process of the Cyber Essentials certification.

We work with small and medium-sized enterprises (SMEs) to manage Cyber Essentials applications, provide cyber security training and ongoing monthly assistance.

Cyber Essentials

Our primary mission at CyberAdvisor is to assist you in achieving and maintaining the Cyber Essentials certification, a government-backed scheme, that offers a straightforward yet powerful approach to safeguarding your organisation.

It's all about enhancing the confidence that your business and customers are protected from cyber threats.

Our self-assessment option gives you protection against a wide variety of the most common cyber attacks. This is important because vulnerability to basic attacks can mark you as a target for more in-depth unwanted attention from cyber criminals and others.

Certification gives you peace of mind that your defences will protect against the most common cyber attacks simply because these attacks are looking for targets which do not have Cyber Essentials in place.

Cyber Essentials shows you how to address those basics and prevent the most common attacks.

Cyber Essentials Plus

Cyber Essentials Plus provides an extra layer of assurance and is a higher level of certification. Certification involves getting an independent validation by an accredited third party. Systems are independently tested, and a technical audit is carried out. Cyber Essentials Plus is then integrated into the organisation's information risk management.

CyberAdvisor is qualified to help achieve both the Cyber Essentials and Cyber Essentials Plus certification for your business.

Six reasons to outsource your IT to RedDoor

1

 Access to expertise

2
